

# Fest & Frightening

From out of the darkness (literally) comes Fast and Frightening a very hot and seductive show put on by Laurie the bass wielding front woman of DEVIL KIT. Now shows featuring all female bands or female fronted bands are nothing new, but at least Laurie picked bands that can play really well. All right maybe I'm just partial to hard rock and punk music played really fast at high volumes. And speaking of females the first band up that night was THE DRIVE. A relatively new band on the scene, they're very passionate about their unique and heavy sound, which is a good way to play your music when starting a new band if you ask me. But take it easy cause you know what they say about beautifully seductive females, they'll drive you nuts.

OK you lucky stiffs, here are a group of women that will change your luck in an instant. LADY UNLUCK, but wait what happened to the pirate theme? Well here they are decked out in their super hero or is it pajama party theme? I was never lucky at guessing costumes, but that's not important, what is important is that this new band is getting the hang of this and with every new show they sound better and better. Their brand of straight no frills rock and punk music is just what you need to shake up especially after a streak of bad luck.

MOTORPSYCHOS - now here is a band that even finicky Mark after Dark would like. Good hard rock right from the gut with songs of lost love, fast cars, and other destructive tendencies. Their CD is chock full of 14 of these fast and hard songs, a must have for your collection put it right next to your BEST of MOTORHEAD CD. I would like to know why one has to go to Pittsburgh to find hard music like this?!

But have no fear cause DEVIL KIT is here and with a CD to boot. They are lead by Laurie whom I've mentioned early on, and they are from New York. Another hold out of hard rock and punk in a city filled with wanna be J-Los and rap stars. Don't bother making space on your shelf for there CD cause you won't be able to take it out of your player, well at least I haven't been able to. Hmm maybe you could toss one of those Metallica CDs you don't like anymore for space?

Till next time...  
Matt O'Halloran
